In public relations and communication science, publics are groups of individual people, and the public (a.k.a. the general public) is the totality of such groupings. This is a different concept to the sociological concept of the Öffentlichkeit or public sphere. The concept of a public has also been defined in political science, psychology, marketing, and advertising.

This is the first tutorial in the "Livermore Computing Getting Started" workshop. It is intended to provide only a very quick overview of the extensive and broad topic of Parallel Computing, as a lead-in for the tutorials that follow it.

### **Introduction to Parallel Computing**

Agenda-setting theory describes the "ability (of the news media) to influence the importance placed on the topics of the public agenda". With agenda setting being a social science theory, it also attempts to make predictions. That is, if a news item is covered frequently and prominently, the audience will regard the issue as more important.
