Travelers who go to tropical and subtropical regions are at risk of getting dengue. These areas include parts of the Caribbean, Central and South America, Western Pacific Islands, Australia, Southeast Asia, and Africa. The mosquito that carries the dengue virus can bite during the day and night, both indoors and outdoors and often lives around buildings in urban areas.

Vulnerability . If you carefully read the information on this webpage, you will learn that, although the fear of flying isn't really about the risks inherent in aviation, it is based in the uncomfortable awareness that life is fragile and vulnerable, and that none of us "much like the man in the fictitious opening story" has any real control over it, whether in the air or on the ground.
